### Deployment Tool:

- onrender, cyclic.sh, Vercel, Heroku

## INTERESTS

Web Development  
Learn About New Things  
Video Editing

## LANGUAGES

English (Intermediate)  
Hindi (Native)

## OBJECTIVE

I am a results-oriented Full-Stack Developer with six months of hands-on experience as Junior Software Engineer at Infoera Software Services Pvt Ltd. During my time there, I honed my skills in web development and programming, and I had the opportunity to work with technologies such as HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, and MongoDB. I also gained experience with core Java for various aspects of project development. I am now seeking a challenging position where I can leverage this experience to contribute to the growth of an innovative organization.

## PROJECTS

### Nodejs Authentication System | [Link](#)

- Developed an authentication system using Node.js and MongoDB.
- Implemented Facebook/Google login and JWT-based authentication.
- Integrated Nodemailer for email functionality.
- Built using Node.js, Express.js, EJS, Passport, MongoDB, Joi, Nodemailer, Jsonwebtoken

### Hospital API | [Link](#)

- Designed API for hospital which has been allocated by the govt for testing & quarantine + well-being of COVID-19 patients.
- Supports registration and reporting for doctors and patients.
- Status of Covid-19 in Patient Report such as Negative, Positive, Admit, Symptoms-Quarantine, Travelled-Quarantine.
- Built using Node.js, Express.js, Passport, Jsonwebtoken, MongoDB

### Habit Tracker App | [Link](#)

- Developed a Habit Tracker helps user track & manage their habits using CRUD operations.
- Allows users to track and manage their daily habits.
- Track each habit every day. These are the 3 statuses of a habit:
- Done - Mark the habit as done for a day.
- Not done - Mark the habit as not done for a day.
- None - User did not take any action on a habit for a day.
- A view to show all current habits.
- Built using Node.js, Express.js, EJS.

### TODO App | [Link](#)

- Created a web-based Todo application with CRUD functionality.
- Added due dates, checklists, and labels for tasks.
- Showing to users for upcoming due dates or incomplete tasks.
- Built using Node.js, Express.js, MongoDB, and Embedded JS.

### Superhero Hunter | [Link](#)

- Created a web app to retrieve information about super hero to delve deeper save movies into favourite.
- A Superhero Hunter WebApp using only vanilla JavaScript, no libraries or frameworks are used.
- Using the MARVEL API and generate the public and private key.
- Utilized the HTML, CSS, Vanilla JavaScript.
